

SA-series code meaning

Series	①Adhesive type	②Adhesive thickness	③Separator base material type	④Resin flow level
SA	FA : Halogen contained, anti-migration FG : Halogen free, high Tg, long-term heat resistance FN : Halogen free, high adhesion · general purpose FP : Halogen free, high Tg, anti-migration FU : Halogen free, high thermal conductivity FV : Halogen contained, high adhesion · general purpose FW : Halogen free, high tackiness FY : Halogen free, low Dk/Df	8 ~ 50μm	※The supplementary information of separator base material type and resin flow level is showed in brackets.
